Reasons for Allowance

1. Claims 1-6, 8-21 and 23 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose all the limitations recited in the base claims 1, 11 and 20. Specifically, the combination of a method of forming a strained semiconductor layer, comprising the steps of: providing a first wafer with a surface comprising of a first semiconductor layer of a first natural lattice constant, wherein the first semiconductor layer is an alloy semiconductor layer comprising silicon and germanium, with a Ge mole fraction between about 5 to 80%; forming a second semiconductor layer with a second natural lattice constant on the first semiconductor layer, the first and second natural lattice constants being different; bonding the second semiconductor layer on the surface of the second wafer, resulting in a third wafer comprised of the second wafer, the second semiconductor layer, and the first wafer; and performing a water jet cleaving procedure at said strain gradient so that the second semiconductor layer is separated from the first semiconductor layer and the first wafer due to cleaving facilitated by the strain gradient.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
